MM-50 — System consisting of Ebony viscous-damped Micro-Touch tonearm, oscillator-power supply, cartridge with sapphire LP stylus. **\$82.50**

Weathers Reproducer Tonearms

MT-3 — Micro-Touch tonearm designed for ease of cueing, viscous-damped pivot assembly. Completely balanced so accurate leveling of the turntable is not necessary. Made of finest basswood for maximum strength with minimum weight. Beautifully finished in ebony with gold accessories. Can only be used with Weathers FM system ... **\$37.50**

Weathers Record Player Systems

WEATHERS HI-FI RECORD PLAYER

Weathers FM pickup system and manual turntable completely assembled, ready to plug into an existing audio system with either preamp or flat amplifier. Includes Weathers FM pickup system with either sapphire or diamond stylus, ML-1 turntable with discushion float. Ebony base in a smooth satin finish with gold anodized turntable and mounting plate.

K-730-S — Record player without preamplifier but includes combined oscillator-power supply (P-620) with sapphire LP stylus. **\$144.00**

K-730-D — Record player without preamplifier but includes combined oscillator-power supply (P-620) with diamond LP stylus. **\$159.00**

Weathers Turntable

ML-1 — Weathers Manual Hi-Fi Record Player consists of 12-pole synchronous motor, ebony base with gold anodized turntable and mounting plate **\$59.95**
 LESS BASE **49.95**

Electronic Drive optional. All speeds supplied with this drive — 78, 33 $\frac{1}{3}$, 45 and 16 $\frac{2}{3}$.

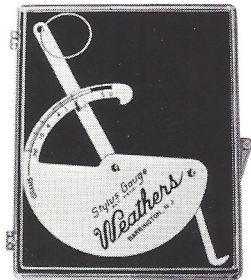

K-730-S, K-730-D and ML-1 are equipped with one speed only — 33 $\frac{1}{3}$.

"Weathers Technical Magic Is Sound"

**WEATHERS
MANUAL HI-FI
TURNTABLE KIT**

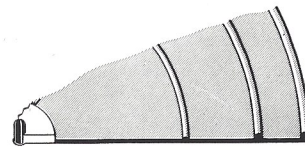

KL-1 — Weathers Manual Hi-Fi Turntable Kit, ready to mount in existing cabinet and sound system. Kit consists of turntable, Weathers conical spring, shock mountings, and discushion but does not include base or mounting plate. All necessary hardware is also included. Complete and easy to assemble **\$34.50**

Weathers Stylus Gauge

P-675 — A simple and accurate way to measure exact tracking force at the point of contact with the record. Indicates adjustments necessary to prevent record wear.

Only \$2.00

**WEATHERS
DISCUSHION**

P-684 — A new concept in record pads, designed by Weathers to protect delicate record surfaces from scratches and

contamination. Graduated height ridges touch only the blank outer rim of records — no part of the playing area ever touches the discushion.

Only \$2.95
